- 1. (Twice Amended) An isolated nucleic acid molecule comprising a part of a nucleic acid sequence, wherein the nucleic acid sequence is selected from the group consisting of:
- (a) a nucleic acid sequence encoding a protein comprising the amino acid sequence of SEQ ID NO: 2;
 - (b) a nucleic acid sequence that is SEQ ID NO: 1;
- (c) a nucleic acid sequence hybridizing to the nucleic acid sequence of (a) or (b); and
- (d) a nucleic acid sequence that has more than 90% sequence identity to (a) or (b);

wherein the part is sufficient to reduce the expression of a debranching enzyme in a plant cell when introduced in antisense orientation.

22. (Amended) The host cell according to claim 16, wherein said nucleic acid sequence of (d) has a sequence identity of more than 95%.

^{*} Applicants enclose a version of claims 1, 22 and 28 marked up pursuant to 37 C.F.R. § 1.121(c)(1)(ii) to show changes made.
